

Special Webinar  
**Customer Appreciation Event**

**"Preventing Moisture Failures in Walls Using Rain Screens  
and Ventilated Cladding Systems  
& Building High-Performance Walls "**

AIA/CES Registered Program ([1 HSW/LU](#))

**When:** 10/20/2020 10:00 AM - 11:30 AM PDT

**Guest Speaker:** Steve Easley Building Science Expert

- Walk away with the knowledge to select and properly install rain screen systems to create ventilated cladding systems and how to integrate with exterior insulation.
- Understand the pros & cons to the 3 most common approaches to water managed wall systems and how these methods differ for barrier wall, concealed barrier walls, and rain screen wall systems.
- Understand the building science behind how walls get wet and the factors that most effect their ability to dry.
- Understand CA Title 24's high performance, and how these requirements apply to other geographies.
